

## DTF UV Application Instructions

1. Before removing the backing, squeegee/scrape the print from all sides to make sure its attached to the sheet.

\*Squeegee entire print using something firm (ie. credit card)\*

2. Use rubbing alcohol to clean the item where the print will be placed.

\*Make sure alcohol is dry before placing print & check for lint\*

3. Flip print over face down & carefully remove the backing of the UV print

\*Best to do this with clean hands\*

4. Making sure the print is correctly positioned & straight, place the print on the item from the center first.

5. Slowly scrape outwards from the middle/center, pushing out air bubbles.

6. Once applied, squeegee/ scrape over print, making sure its fully adhered.

7. Carefully remove the clear film.
